## **Description**

SynthFont is a free MIDI player using SoundFonts. The program can be used on a standard PC with any modern version of Microsoft Windows™ or on some versions of Linux with WINE installed. SynthFont works with most standard audio cards, or even without a card just to create audio files.

## **Using SynthFont**

Load a MIDI file. Select the SoundFont(s) to be used for each midi channel or set a default SoundFont (menu item 'File') to be used by all channels. Select the preset (or instrument) to be used. Finally, press the Play button.

## **System Requirements**

- Windows 98, NT, 2K, XP, Vista
- Linux with WINE

## **Who to Contact**

Send all questions, comments, shortcomings, bug reports, etc. to [synthfont@sci.fi](mailto:synthfont@sci.fi).

## **Registration**

SynthFont is Freeware, but to remove the "splash screen" you have to receive a registration code from me. To receive a code you may either donate using PayPal or SWREG, or help me solve a technical problem or develop a new feature.
